Cumulative contents of Volume 77

Volume 77, No. 1, August 1999

Papers

P. Corriveau, C. Gojmerac, B. Hughes and L. Stelmach
All subjective scales are not created equal: The effects of context on different scales 1
S.A. ALshebeili, A.M. Al-Qurainy and A.S. Al-Ruwais
Nonlinear approaches for narrowband interference suppression in DS spread spectrum systems 11
M. Agrawal and S. Prasad
Optimum broadband beamforming for coherent broadband signals and interferences 21
C. Richard and R. Lengelle
Data-driven design and complexity control of time-frequency detectors 37
M.A. Hasan
DOA and frequency estimation using fast subspace algorithms 49
R. Brissett and J. Sodha
On unequal error protection using convolutional codes 63
V. Katkovnik
Robust *M*-estimates of the frequency and amplitude of a complex-valued harmonic 71
W.I. Tam, K.N. Plataniotis and D. Hatzinakos
An adaptive Gaussian sum algorithm for radar tracking 85

Fast communications

M.A. Kutay, H. Özaktaş, H.M. Ozaktas and O. Arıkan
The fractional Fourier domain decomposition 105
A.I. Zayed and A.G. García
New sampling formulae for the fractional Fourier transform 111
I. Djurović and LJ. Stanković
Time–frequency representation based on the reassigned S-method 115

Volume 77, No. 2, September 1999

Papers

R.H. Glendinning
Robust shape classification 121
R.J. Martin
Autoregression and irregular sampling: Spectral estimation 139
S. Qiu, F. Zhou and P.E. Crandall
Discrete Gabor transforms with complexity $O(N \log N)$ 159
J.-K. Guo, C.-H. Chen and J.-D. Lee
Multi-polyhedron reconstruction in a three-view system using relaxation 171

Elsevier Science B.V.

K. Yu, X. Jiang and H. Bunke
Lipreading using signal analysis over time 195
C. Huet and J. Le Roux
Linear system blind identification based on fourth order spectral analysis 209
C.-C. Lee and J.-H. Lee
An efficient method for blind digital signal separation of array data 229

Volume 77, No. 3, September 1999

Papers

M. Jansson and P. Stoica
Forward-only and forward-backward sample covariances – A comparative study 235
M.J. Coates and W.J. Fitzgerald
Regionally optimised time–frequency distributions using finite mixture models 247
H. Akçay and B. Ninness
Orthonormal basis functions for modelling continuous-time systems 261
K. Doğançay and V. Krishnamurthy
Blind identification of fractionally spaced communication channels with Markov inputs 275
J. Skowronski
A nonlinear transform for subband image coding 289
F. Pedersini, A. Sarti and S. Tubaro
Accurate and simple geometric calibration of multi-camera systems 309
H. Delic
Distributed weak signal detection and asymptotic relative efficiency in dependent noise 335

Fast communications

S.-W. Lee, J.-S. Lim, S. Baek and K.-M. Sung
Time-varying signal frequency estimation by VFF Kalman filtering 343
G. Ramponi
Contrast enhancement in images via the product of linear filters 349

Announcement 355
